Measure and Control Production of Your Cellulose Nanomaterials Technical Program

As more companies are producing cellulose nanomaterials, the analytical techniques to measure and control production are also in rapid development. Make plans to be at TAPPI Nano 2017 on Thursday, June 8, 2017 to attend a full day of sessions devoted to new metrology methods, quantitative property control during production of cellulose nanofibers, international and commercial measurement needs, and measuring intrinsic properties of cellulosic nanomaterials.

The Woodbridge Group Sponsor Spotlight

A Bronze Sponsor of Nano 2017, The Woodbridge Group offers innovative urethane and particle foam technologies, to serve the automotive, commercial, military and recreational vehicle industries, along with several other business sectors including: Protective Packaging, Healthcare, and Building products.

[Learn more about Woodbridge](#) and meet their experts during Nano 2017.

Perspectives from End Users New for 2017!

Session 12: End Users Panel Discussion Tuesday, 6 June 2017

Hear from representatives of Cabot Corporation, Ford Motor Company, L'Oreal and Schlumberger in this first-of-its-kind panel. This year's conference co-chairs wanted to ensure the program included an opportunity to hear from potential end users. These global companies will comment on their interest in cellulose nanomaterials and their potential applications.

Meet Other EHS Professionals at the Bio/Nano Technologies Workshop*

Networking Events

Monday, 5 June, 2017, 1:00 – 4:00pm

***Separate Registration Required. Cost to attend: \$160**

This half-day workshop will focus on the occupational, environmental, and consumer health and safety requirements for new technologies, with a special focus on bio-based nanomaterials. Interactive presentations will explore these issues from the perspectives of data development, risk assessment and management strategies, and regulatory requirements. [Learn more.](#)

Stop by the TAPPI Nano Student Booth Just for Students

Be sure to stop by the TAPPI Nano Student Booth while you are at the conference. Find out more about this new committee, learn how to get involved, and see a slideshow showcasing the student presenters at TAPPI Nano 2017.

[Check out all of the activities sponsored by the Student Committee.](#)

Why Does TAPPI Need to Review PowerPoints?

Just for Speakers

In two words: Antitrust and Commercialism. Unlike many other conferences, presenters at TAPPI Nano must have their presentation reviewed to ensure talks are in line with TAPPI's antitrust and commercialism policies. These policies protect the author, the industry, and TAPPI.

6 May 2017

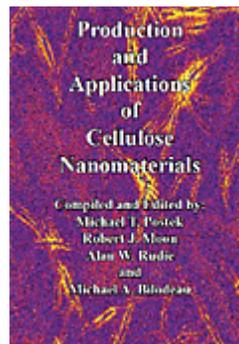

[Review the deadlines](#) and make sure to submit your material on time: 6 May 2017.

Production and Applications of Cellulose Nanomaterials

From the TAPPI Nano Division

Authors: Michael T. Postek, Robert J. Moon, Alan W. Rudie, Michael A. Bilodeau

The book is a collection of two to three page summaries on recently completed and on-going research with these high strength materials - and identifies a who's-who of research as well as leads on successful applications. Topics include: production and modification, composites, other applications, modeling, and standards. *Available through TAPPI Press. List Price: \$275. TAPPI Member Price: \$215. [Learn more and see the Table of Contents.](#)*
